Type of internship (Please mark with a cross where applicable):

☐ Orientation internship

The orientation internship is intended for acquiring initial practical experience in general areas related to health and patient care. The students are to be given initial insights into professional ethical principles as well as the institutional, legal, and structural framework conditions of patient care. Furthermore, they should be shown the fundamental structures of interdisciplinary collaboration and structural measures for patient safety.

- ☐ The internship took place at an interdisciplinary health care facility or at another facility, in which counseling, prevention or rehabilitation for the maintenance, promotion and restoration of mental health are provided (mandatory).
- ☐ The internship included 150 h - full-time work or a part-time job of comparable scope (mandatory, 1 ECTS = 30 h).

☐ Professional Qualifying Activity I

The qualifying professional activity I - Introduction to the practice of psychotherapy serves to acquire initial practical experience in specific areas of psychotherapeutic care (§ 15 Abs. 1 PsychThApprO).

- ☐ The internship included at least 6 weeks of full-time work or a part-time job of comparable scope (240 h).
- ☐ The internship site meets at least one of the following requirements:
 - ☐ The facility provides psychotherapeutic, psychiatric, psychosomatic or neuropsychological care
 - ☐ The facility provides prevention or rehabilitation.
 - ☐ The facility provides care for people with disabilities
 - ☐ Other institutional health care institution

- ☐ The student learned about interdisciplinary cooperation of the different professional groups (mandatory)
- ☐ The student developed basic competencies in communicating with patients and with other involved persons or professional groups (mandatory).
- ☐ The institution employs psychotherapists who, after graduating in psychology, have completed at least three years of additional professional training that meets the requirements of the **EuroPsy Specialist Certificate in Psychotherapy**¹ (or equivalent) and who are authorized to practice psychotherapy in the respective health care system of the country (mandatory)

¹ The post-graduate training included at least: 90 ECTS of further study, of which 400 hours should be devoted to theory, three years of postgraduate practice, of which 500 hours is supervised practice, 150 hours of supervision (on average 50 per year)
